About Us (Introduction)

We are a specialized general contracting company delivering high-quality finishing and decorative works, along with integrated and advanced flooring protection solutions. Built on a strong foundation of engineering expertise and professional project management, we serve residential, commercial, industrial, and warehouse sectors with precision, reliability, and strict commitment to project timelines. Our expertise includes complete interior and exterior finishing works, innovative decorative solutions, high-performance epoxy flooring systems, impact-resistant rubber protection systems, and all types of guidance and traffic signage using phosphorescent materials and solar-powered systems—designed to meet the most demanding operational environments in accordance with the highest standards of quality and safety.

شركة هيرا ميدل إيست
Heera Middle East Company

Who We Are

A team of experienced engineers, project managers, and skilled technicians dedicated to transforming spaces into durable, functional, and aesthetically refined environments.

We combine technical expertise, modern materials, and international standards to achieve superior results.

Heera Middle East Company
0563657274 - 0547722446

Company VISION & Mission

Vision

- To be recognized as a leading contracting company in finishing works and specialized flooring systems, setting new benchmarks in quality, durability, and client satisfaction.

Mission

- To deliver professional, high-quality finishing and flooring solutions through:
- Technical excellence
- Reliable project execution
- Innovative materials and systems
- Strong client partnerships
-

Core Values

- Quality & Precision
- Integrity & Transparency
- Commitment to Deadlines
- Safety & Compliance
- Continuous Improvement

RUBBER CORNER GUARDS EPDM

Product Description

EPDM Rubber Corner Guards are flexible protective profiles designed to protect corners, edges, and structural surfaces from impact, abrasion, and wear. They are widely used in industrial, commercial, and parking applications due to their excellent weather and aging resistance.

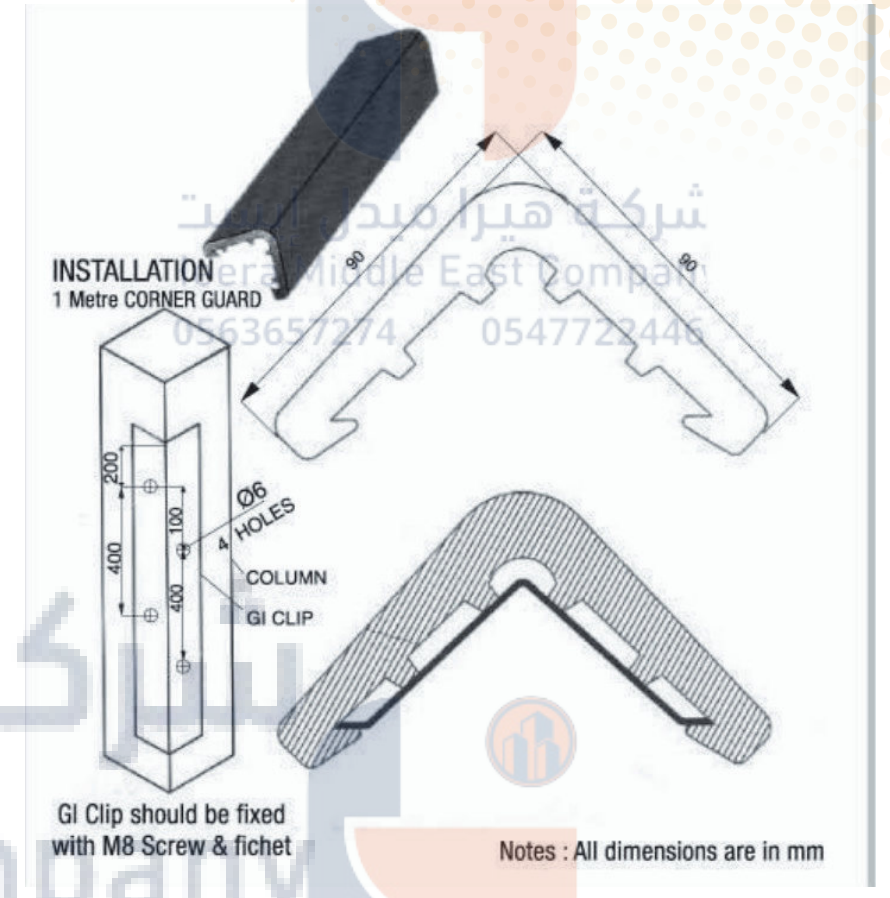

- **Material: High-quality EPDM Rubber**

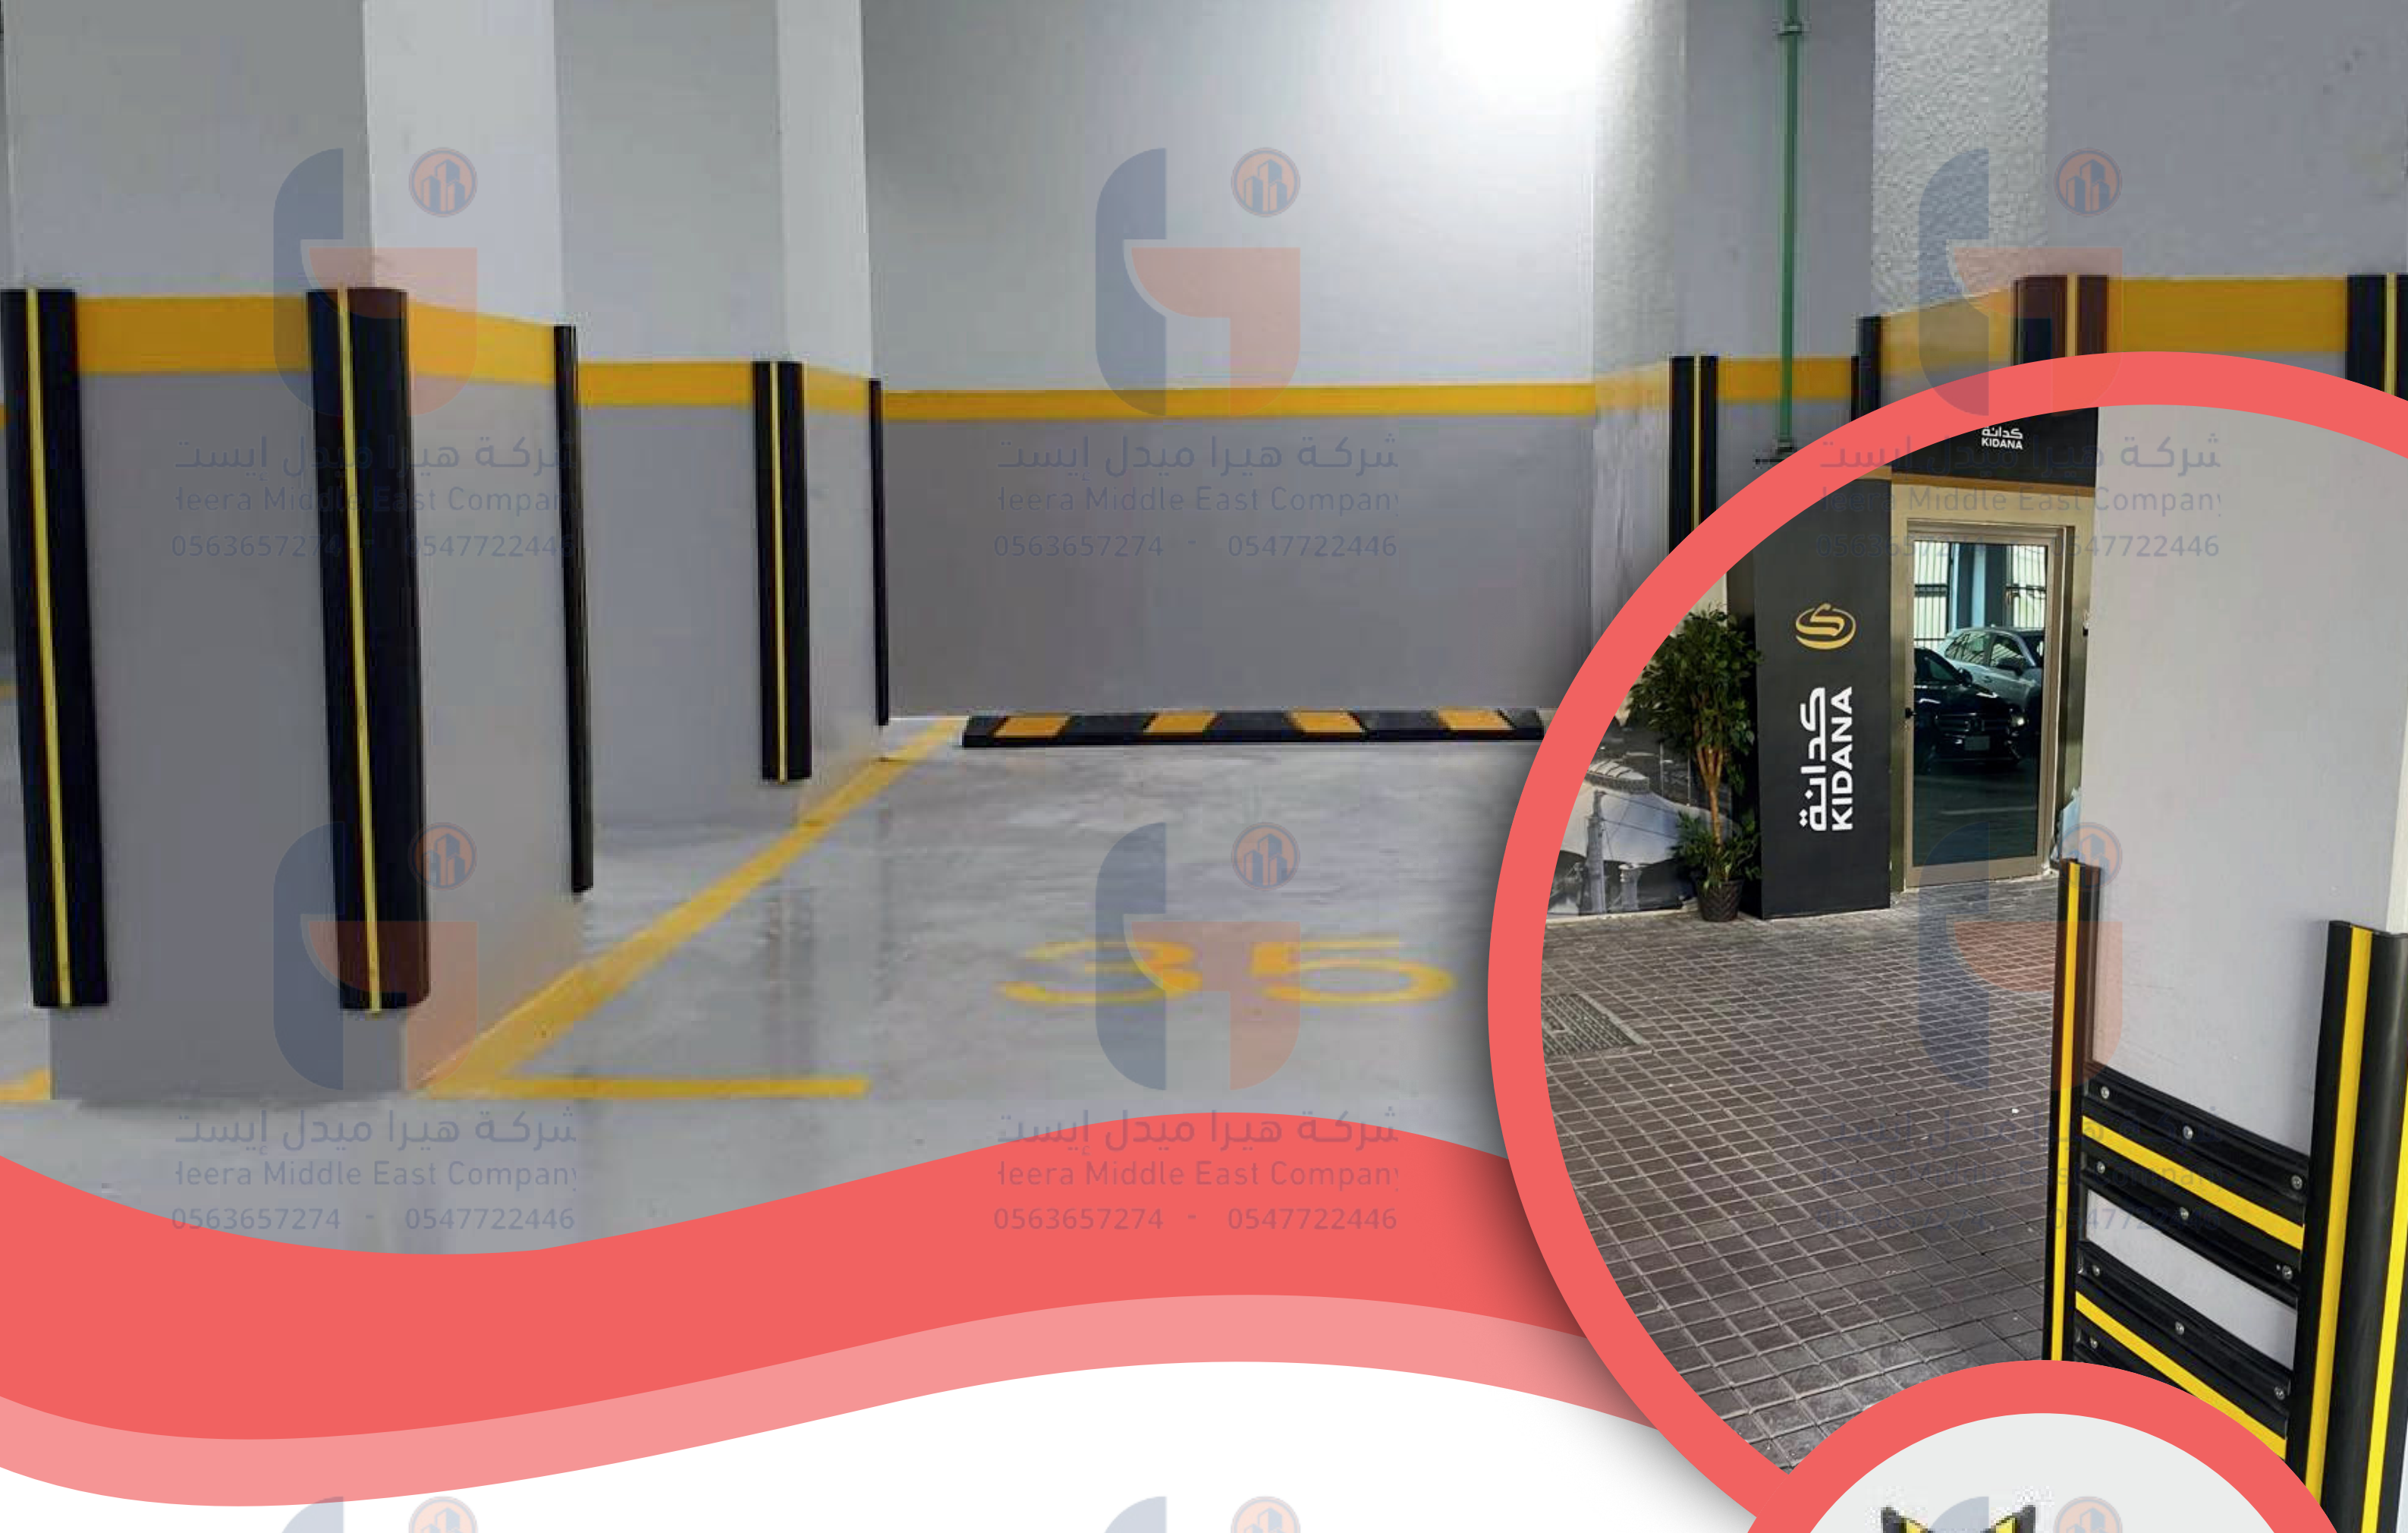

Purpose: Protection of corners and edges against impact and abrasion

Color: Black (other colors available upon request)

,Available in 90° angle with standard lengths of 1, 2 and 3 meters, and leg widths of 50×50, 75×75, and .mm 100×100

Different thicknesses and custom sizes are available upon request

RUBBER CORNER GUARDS EPDM

Installation

Easy to install using mechanical fixings or industrial adhesive on concrete, steel, or wall surfaces.

Provides secure and long-lasting protection with minimal maintenance

Importance & Advantages

Rubber corner guards protect building corners and edges from impact damage, extending surface life and reducing maintenance costs. They offer high impact absorption, durability, and excellent resistance to weather and outdoor conditions.

RUBBER WALL GUARDS EPDM

شركة هيرا ميدل إيست
Jeera Middle East Company
0563657274 - 0547722446

01 Description

EPDM rubber wall guards are designed to protect walls and surfaces from impact, abrasion, and damage in high-traffic areas.

Jeera Middle East Company
0563657274 - 0547722446

02 Material

- High-quality EPDM rubber
- Flexible, durable, and impact resistant
- Excellent resistance to weather, UV, and aging

03 Standard Sizes

- Standard lengths: 1,000 / 2,000 / 3,000 mm
- Thickness: 8 – 15 mm
- Height / Width: as per standard profiles or project requirements

04 Installation

- Easy installation using mechanical fixings or industrial adhesive
- Suitable for concrete, blockwork, drywall, and steel surfaces

RUBBER WALL GUARDS EPDM

شركة هيرا ميدل إيست
Heera Middle East Company
0563657274 - 0547722446

Importance

- Rubber wall guards made from EPDM are designed to absorb impacts, protect walls from damage, and are ideal for use in industrial and commercial environments.
- Key Features of EPDM Rubber Wall Guards

Applications

- **Industrial Settings:** Ideal for loading docks, warehouse perimeters, and industrial corridors where heavy traffic occurs.
- **Commercial Use:** Commonly used in parking garages and service areas to protect walls from collisions and abrasions caused by moving objects.
- **Corner Protection:** EPDM wall guards can also be used to protect corners and edges of walls, enhancing safety in high-traffic areas.

Advantages

- Protects walls from damage and reduces maintenance costs
- High impact absorption and long service life
- Suitable for indoor and outdoor applications

SAFTY USAGE FOR SPEED HUPS

RUBBER CAR SPEED HUMPS EPDM

Description

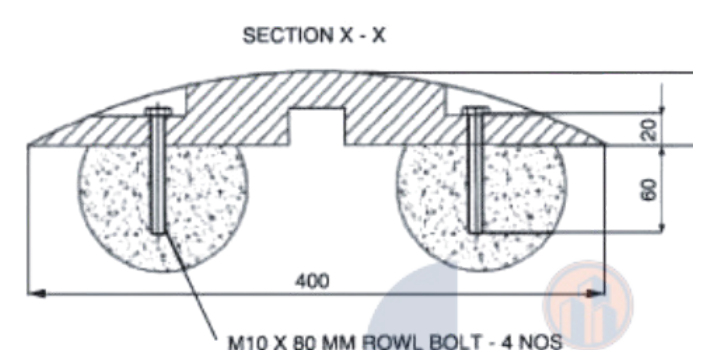

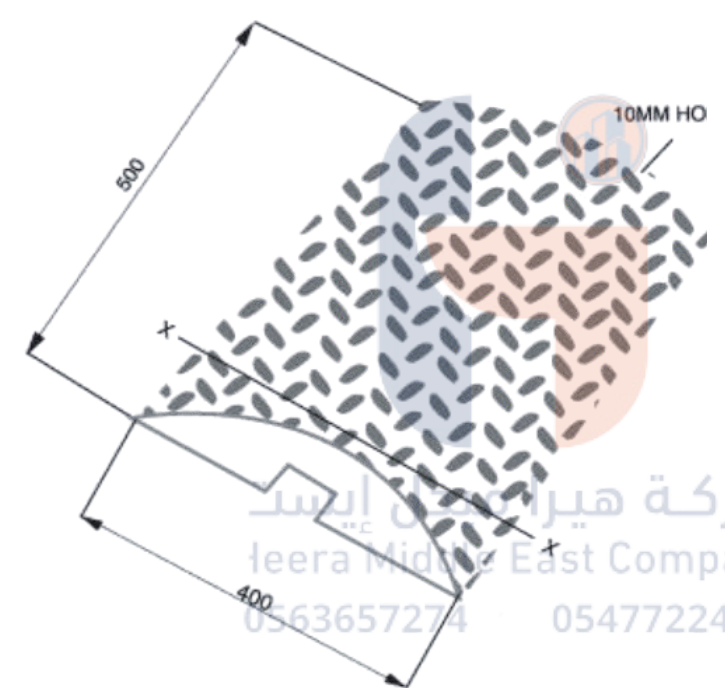

EPDM rubber speed humps are traffic-calming devices designed to control vehicle speed and improve safety in parking areas and roadways.

Material

- High-quality EPDM rubber
- Heavy-duty, flexible, and impact resistant
- Excellent resistance to weather, UV, and aging

Standard Sizes

- Standard length modules: 500 mm / 1,000 mm
- Width: approx. 350 – 400 mm
- Height: approx. 50 – 75 mm
- Modular design allows customized lengths

SAFTY USAGE FOR SPEED HUMPS

RUBBER CAR SPEED HUMPS EPDM

Installation

- Fixed to asphalt or concrete surfaces using anchor bolts
- Easy and quick installation with minimal maintenance

Importance & Advantages

- Reduces vehicle speed and enhances pedestrian safety
- High load-bearing capacity and long service life
- Resistant to outdoor conditions and heavy traffic
- Suitable for parking areas, residential compounds, and commercial zones

RUBBER CAR STOPPER

Description

- EPDM rubber car stoppers are designed to prevent vehicles from overrunning parking spaces and to protect walls, curbs, and other vehicles.

MATERIAL

- High-quality EPDM rubber
- Heavy-duty, flexible, and in
- Excellent resistance to wear

STANDARD SIZES

- Typical length: 1,800 mm (modular lengths available)
- Width: approx. 150 – 200 mm
- Height: approx. 100 – 150 mm
- Reflective strips available for visibility

RUBBER CORNER GUARD (CHINESE-MADE)

DESCRIPTION

Chinese-made rubber corner guards designed to protect wall corners and columns in parking areas, warehouses, and industrial facilities from vehicle and impact damage.

MATERIAL

- High-quality recycled rubber
- Flexible, impact-absorbing material
- High-visibility yellow reflective stripes or reflective inserts
- UV-resistant and weatherproof surface

STANDARD SIZES

- Length: 800 mm / 1000 mm / 1200 mm
- Width: 80 - 120 mm (per side)
- Thickness: 10 - 20 mm

EPOXY WORKS FLOORING & TANK INSULATION

شركة هيرا ميدل إيست
Heera Middle East Company
0563657274 - 0547722446

MATERIAL

- Two-component epoxy resin system

- High adhesion to concrete and steel surfaces

- Resistant to chemicals, moisture, and abrasion

STANDARD THICKNESS / SIZE

- Flooring epoxy thickness: 2 – 4 mm

- Tank epoxy lining thickness: 3 – 5 mm

- Applied as a continuous seamless coating

INSTALLATION

- Surface preparation by grinding or shot blasting

- Application of epoxy primer, body coat, and top coat

- Applied by roller or trowel as per system requirements

Type	Main Applications	Typical Thickness	Advantages	Notes
Self-Leveling Epoxy	Factories, hospitals, parking areas	2 - 5 mm	Smooth finish, aesthetic look, easy to clean	Requires well-prepared level surface
Anti-Slip Epoxy	Ramps, wet areas, industrial zones	2 - 4 mm	High safety, slip-resistant surface	Slightly rough texture
Heavy-Duty Epoxy	Warehouses, heavy industries	3 - 6 mm	High load and impact resistance	Higher cost than standard systems
Decorative Epoxy (Flake / 3D)	Showrooms, offices, malls	2 - 4 mm	Attractive decorative finishes	Mostly for light to medium traffic
Anti-Static / ESD Epoxy	Electronics factories, server rooms	2 - 3 mm	Prevents static electricity buildup	Requires grounding system

ASPHALT WORKS

DESCRIPTION

Asphalt works include the supply, laying, and compaction of asphalt concrete for roads, bridges, and parking areas to provide durable and smooth driving surfaces

MATERIAL

- Hot mix asphalt (HMA) complying with project and local authority standards
- Bitumen binder of approved grade
- Crushed aggregates with proper gradation

STANDARD THICKNESS

- Wearing course: 40 – 50 mm
- Binder course: 50 – 70 mm
- Thickness as per design and traffic load

0563657274 - 0547722446

INSTALLATION

- Surface preparation and cleaning
- Application of prime coat / tack coat
- Laying by asphalt paver and compaction using rollers

IMPORTANCE & ADVANTAGES

- Smooth, skid-resistant, and durable surface

- Withstands heavy traffic and weather conditions

- Long service life with low maintenance

CURBSTONES

- **CONCRETE CURBSTONES ARE PRECAST ELEMENTS USED TO DEFINE ROAD EDGES, SEPARATE SIDEWALKS, AND ORGANIZE TRAFFIC FLOW IN URBAN AND LANDSCAPE AREAS**

MATERIALS:

- **PRECAST HIGH-STRENGTH CONCRETE**
- **OPTIONAL REINFORCED STEEL (AS REQUIRED)**
- **SMOOTH OR TEXTURED SURFACE FINISH**

TECHNICAL SPECIFICATIONS

- **COMPRESSIVE STRENGTH: ≥ 30 MPA**
- **STANDARD LENGTH: 500-1000 MM**
- **HEIGHT: 250-300 MM**
- **WIDTH: 120-180 MM**
- **INSTALLED ON CONCRETE BEDDING WITH PROPER ALIGNMENT**
- **WEATHER-RESISTANT AND HEAVY-DUTY PERFORMANCE**

INTERLOCK TILES

- **INTERLOCKING CONCRETE PAVERS ARE DURABLE PAVING UNITS USED FOR SIDEWALKS, PARKING AREAS, DRIVEWAYS, AND LANDSCAPE PROJECTS.**

Technical Data Sheet

Interlocking Paving Unit (Rectangular 198*98*60/80 mm)

Product No. REC- 000

*Dimension:

Length: 200 mm
Width: 100 mm
Height: 60/80 mm

*Density:

2 to 2.3 gram per cubic centimeter

*Weight:

6cm (2.2-2.5 Kg) & 8 cm (3-4 kg)

*Compressive:

min 55 Mpa

*Absorption:

Max 5 %

*Abrasion Resistance:

Max 3 mm

*Mix Design:

Main Mix	Face Mix
Aggregate 3/8 (4.75 - 9.5) mm	Fine Sand 0 - 1.18
Aggregate 3/16 (2.36 - 4.75) mm	Portland Cements (OPC)
Coarse Sand (0.3 - 4.75) mm	Pigment
Pigment	W/C 0.4
Portland Cements (OPC)	
W/C 0.4	

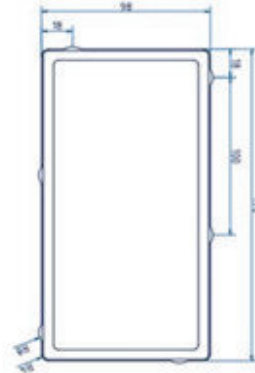

*Process :

* We use the best technology present at the market (German technology with Compression nearly 20 ton) which gives homogenous mix and high quality products

* Curing Time : Minmum 24 Hours

* Curing System: Closed Chambers With Ventilation System full automatic

* Productivity : 9000 m2 Daily.

MATERIALS:

- **VIBRO-PRESSED CONCRETE**
- **HIGH-STRENGTH COLORED CONCRETE LAYER (OPTIONAL)**

TECHNICAL SPECIFICATIONS

- **COMPRESSIVE STRENGTH: $\geq 35-40$ MPA**
- **THICKNESS: 60 MM (LIGHT TRAFFIC) / 80 MM (HEAVY TRAFFIC)**
- **STANDARD SHAPES: RECTANGULAR, ZIGZAG, I-SHAPE, ETC.**
- **INSTALLED OVER SAND BEDDING WITH COMPACTED BASE**
- **HIGH LOAD RESISTANCE AND EASY MAINTENANCE**

- **CONCRETE WHEEL STOPPERS ARE USED TO ORGANIZE VEHICLE PARKING AND PREVENT COLLISIONS WITH STRUCTURES.**

MATERIALS:

- **HIGH-STRENGTH PRECAST CONCRETE**
- **REINFORCED WITH STEEL BARS (IF REQUIRED)**
- **HIGH-VISIBILITY REFLECTIVE PAINT OR INSERTS (OPTIONAL)**

TECHNICAL SPECIFICATIONS

- **COMPRESSIVE STRENGTH: NOT LESS THAN 30 MPA**
- **STANDARD LENGTH: 500-1800 MM (AS REQUIRED)**
- **WIDTH: 120-150 MM**
- **HEIGHT: 100-150 MM**
- **SURFACE FINISH: SMOOTH OR ANTI-SLIP**
- **FIXING: ANCHOR BOLTS OR EMBEDDED INSTALLATION**

Specialized Works for Fuel Stations

Asphalt Works

Heavy-duty asphalt paving for station yards and access roads, designed to withstand fuel spills and heavy traffic loads.

Road & Area Marking

High-visibility traffic markings for lanes, parking, and circulation paths to ensure safe and organized vehicle movement.

Epoxy Flooring

Fuel- and chemical-resistant epoxy flooring systems for service areas, shops, and technical rooms.

🎯 Epoxy Floor Marking

Durable epoxy-based markings for pedestrian paths, safety zones, and operational areas inside the station.

⚠️ Safety & Accessories

Supply and installation of car stoppers, speed humps, bollards, corner guards, mirrors, and directional & warning signs.

✅ Key Benefits

- Enhanced safety and traffic control
- High durability and chemical resistance
- Compliance with operational requirements of fuel stations
- Clean, organized, and efficient station layout

METAL WORK

WE PROVIDE COMPREHENSIVE METAL FABRICATION AND STEEL FORMING SERVICES IN ACCORDANCE WITH HIGH QUALITY STANDARDS. OUR SCOPE INCLUDES THE MANUFACTURING OF STEEL DOORS, WINDOWS, AND HANDRAILS IN VARIOUS DESIGNS AND SIZES TO SUIT RESIDENTIAL, COMMERCIAL, AND INDUSTRIAL PROJECTS

Key Features

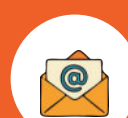

- DESIGN AND FABRICATION AS PER DRAWINGS AND TECHNICAL SPECIFICATIONS
- HIGH-QUALITY STEEL MATERIALS FOR STRENGTH AND DURABILITY
- PROFESSIONAL CUTTING, BENDING, WELDING, AND FINISHING PROCESSES
- ANTI-CORROSION PROTECTION USING EPOXY OR OVEN-BAKED COATINGS
- MODERN AND CLASSIC DESIGN OPTIONS

ALUMINUM WORKS

Aluminum works include the supply, fabrication, and installation of aluminum profiles and systems used in façades, windows, doors, partitions, and architectural cladding, in accordance with approved drawings and specifications.

TYPES OF ALUMINUM PROFILES

- ✓ • Standard aluminum profiles
- ✓ • Thermal break aluminum profiles
- ✓ • Curtain wall systems
- ✓ • Shopfront systems
- ✓ • Aluminum louvers and ventilation profiles

ELEMENTS

SCOPE OF WORKS

- ✓ • Aluminum windows and doors
- ✓ • Glass and aluminum façades
- ✓ • Internal aluminum and glass partitions
- ✓ • Aluminum handrails and balustrades
- ✓ • Aluminum cladding and architectural features

GRC Facade Systems

(Glassfiber Reinforced Concrete)

Description

GRC facade systems are architectural cladding elements used for building facades, offering high design flexibility and the appearance of natural concrete or stone with reduced weight.

Materials

Cement-based mix reinforced with glass fibers

Factory-molded panels with various textures and finishes

Importance & Advantages:

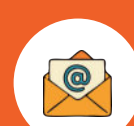

- Lightweight compared to traditional concrete
- High durability and weather resistance
- Excellent design flexibility and architectural detailing
- Suitable for complex facade shapes

054 772 2446

www.heeramiddleeast.com

info@heeramiddleeast.com

GRP Facade Systems

(Glassfiber Reinforced Plastic)

Description

GRP facade systems are lightweight composite cladding panels used for building facades, providing high strength, flexibility, and modern architectural finishes.

Materials

- Polyester or epoxy resin reinforced with glass fibers
- Factory-finished panels with smooth or textured surfaces

Importance & Advantages:

- Very lightweight with high strength-to-weight ratio
- Excellent resistance to corrosion and weather conditions
- Easy installation and reduced structural load
- Suitable for modern and customized facade designs

PRECAST CONCRETE SYSTEMS

GENERAL DESCRIPTION

- Precast concrete consists of structural and architectural concrete elements manufactured in specialized factories under controlled conditions, then transported and installed on site. This system is widely used in buildings and infrastructure projects to ensure high quality, durability, and fast construction.

TYPICAL PRECAST CONCRETE ELEMENTS

- Columns and beams
- Precast slabs and floor systems
- Load-bearing and non-load-bearing walls
- Staircases and landings
- Prestressed and post-tensioned elements
- Facade panels and boundary walls
- Manholes, utility chambers, and infrastructure elements

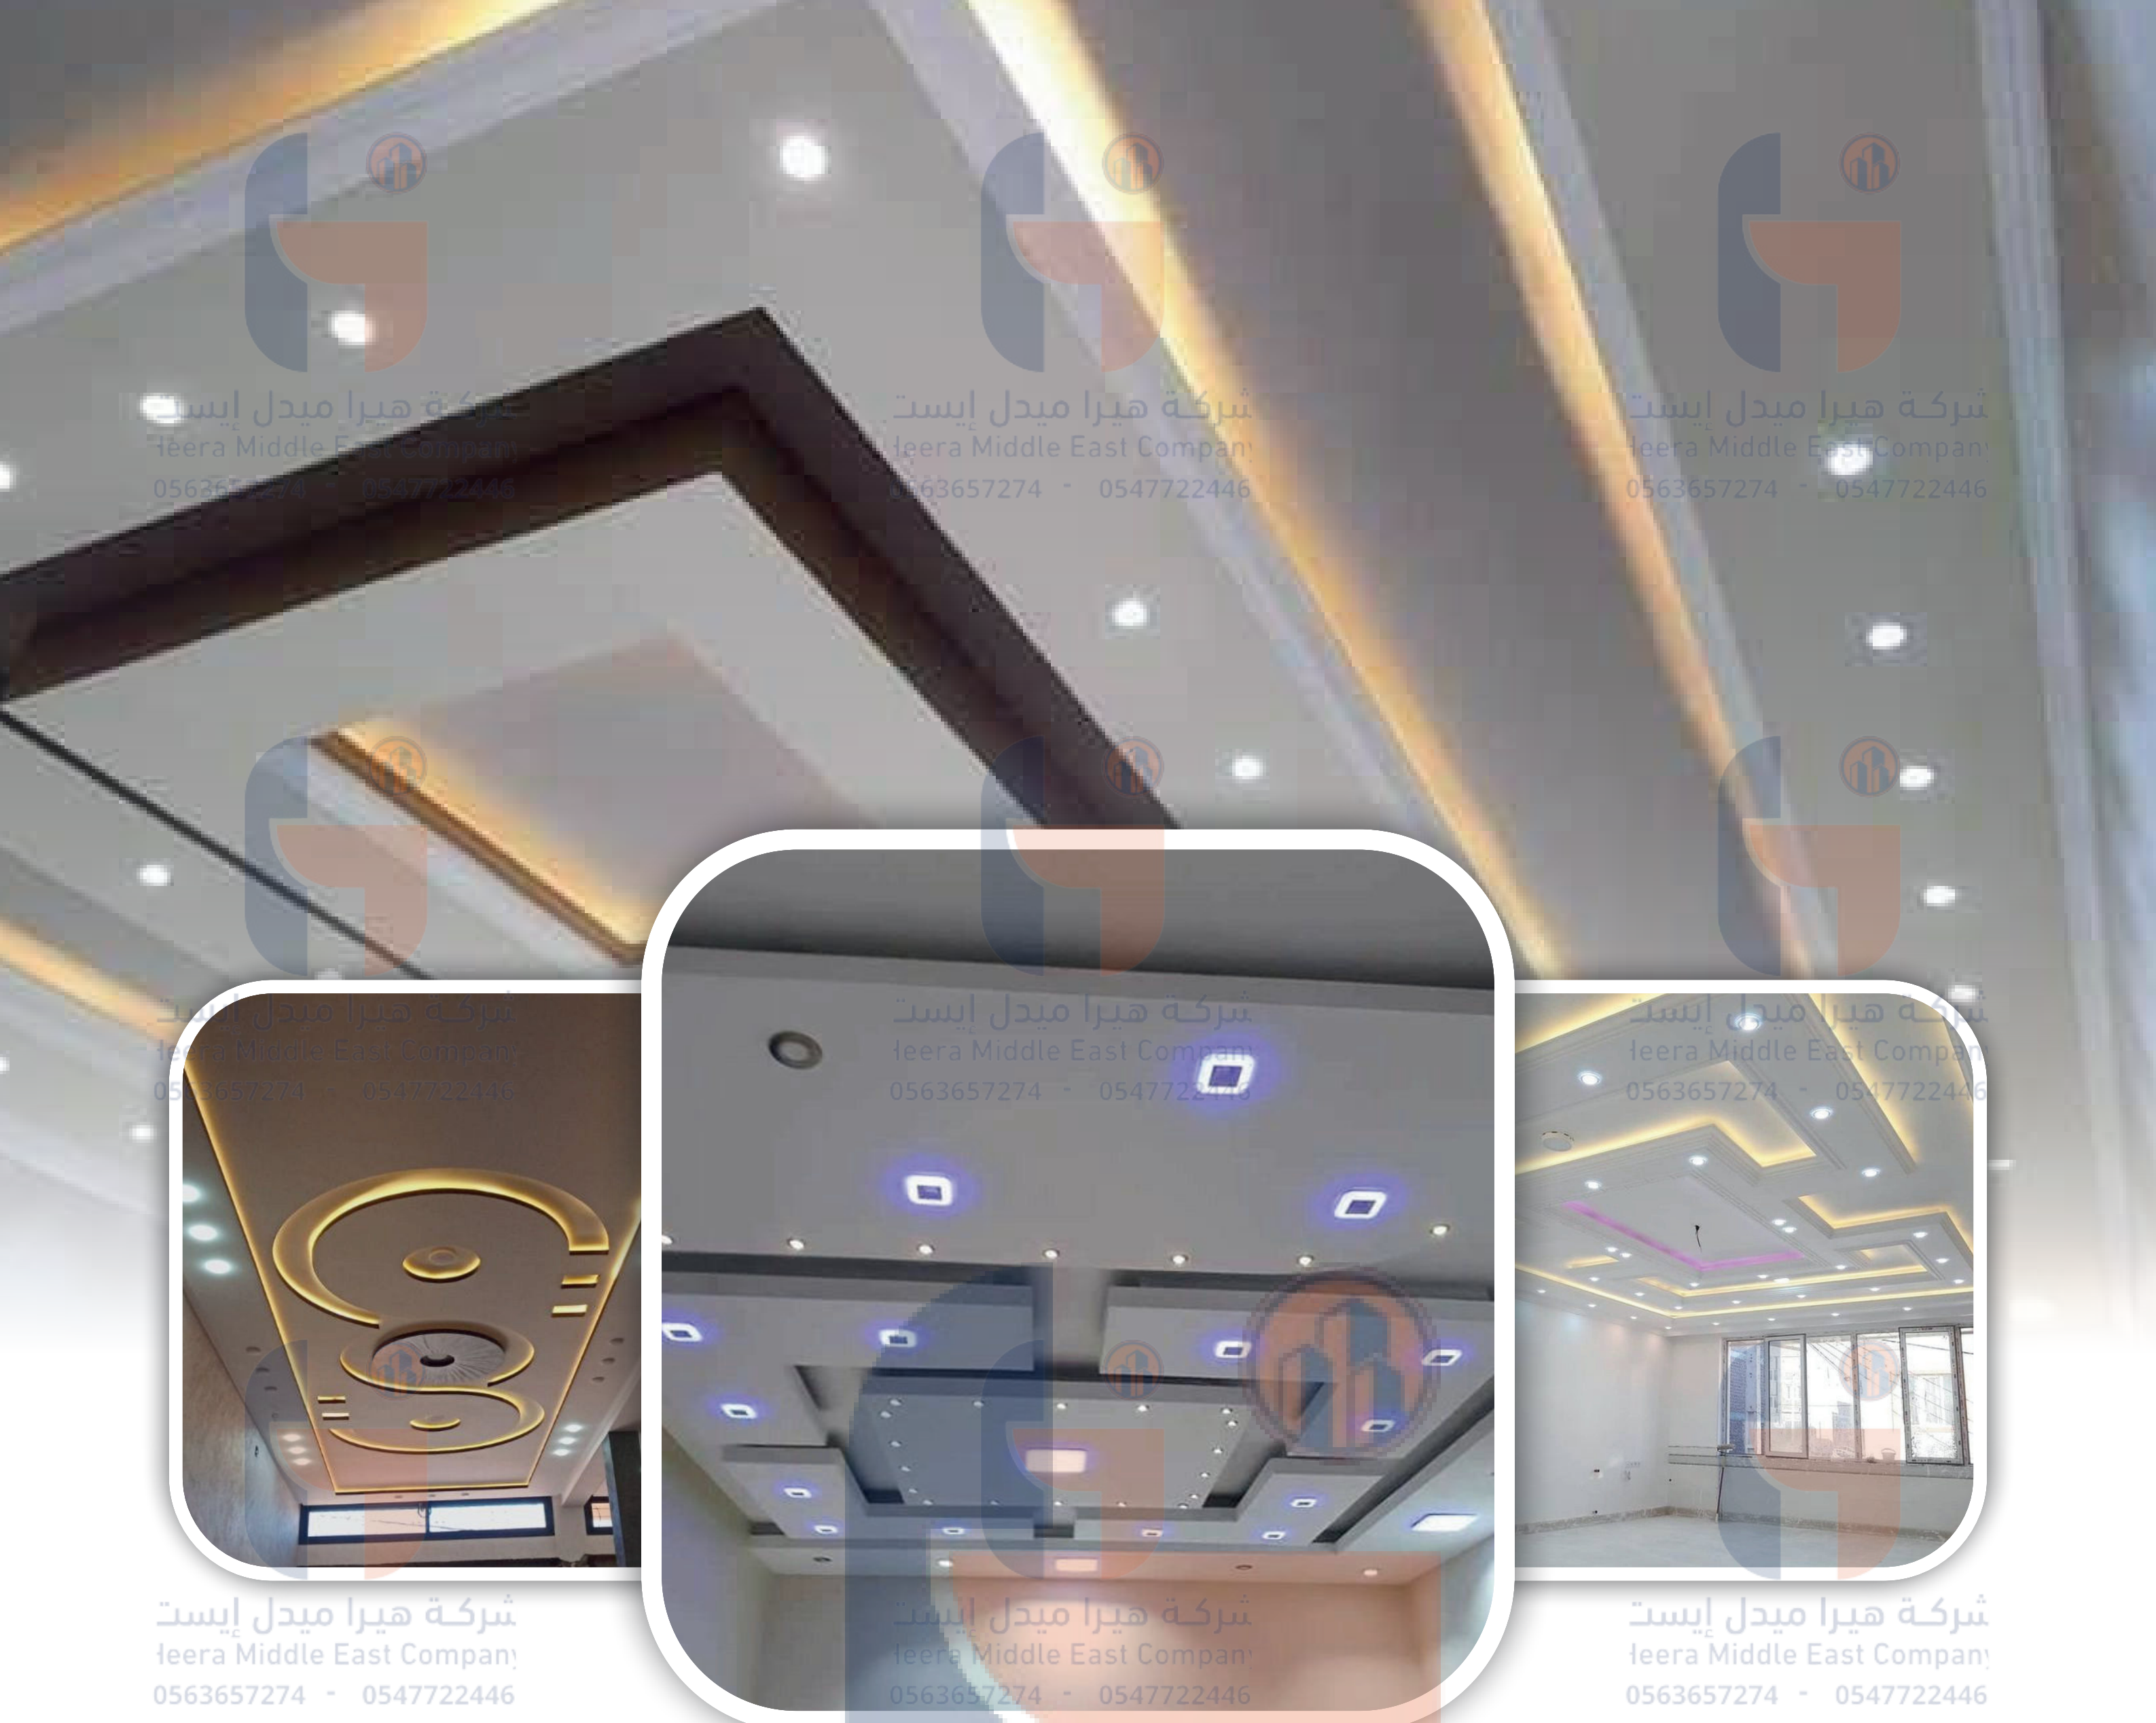

PRECAST CONCRETE SYSTEMS

MATERIALS

- High-strength concrete complying with SBC 304 – Concrete Structures Code
- Reinforcing steel or prestressing tendons as per approved structural design
- Approved concrete admixtures to improve workability and durability
- Embedded plates, anchors, and connection accessories

MANUFACTURING & QUALITY CONTROL

- Casting in approved steel or wooden molds
- Proper curing methods to achieve specified concrete strength
- Mandatory testing of concrete strength and quality as per SBC
- Factory quality control and documentation

GYPSUM BOARD

Description

Gypsum board is a modern finishing system consisting of gypsum panels fixed on a galvanized metal framework. It is widely used for suspended ceilings and internal partitions due to its light weight, fast installation, and clean aesthetic finish

Types of Gypsum Boards

- *Standard Gypsum Board: For general interior dry areas.
- *Moisture-Resistant Board: For kitchens, bathrooms, and humid areas.
- *Fire-Resistant Board: For areas requiring fire protection.
- *Moisture & Fire-Resistant Board: For sensitive areas such as hospitals and commercial kitchens

GYPSUM BOARD

Advantages

- Fast and easy installation.
- Lightweight, reducing structural load.
- Good acoustic and thermal insulation.
- Flexible for various architectural and decorative designs

Main Components & Details

- Galvanized metal framework (U-Tracks and C-Studs).
- Gypsum boards with different thicknesses (9.5 - 12.5 - 15 mm).
- Joint tape and finishing compound.
- Optional thermal or acoustic insulation.
- Final paint or decorative finish as per design.

ROAD SIGNS, CONCRETE BARRIERS, AND NEW JERSEY

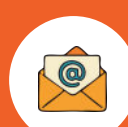

Road signs, concrete barriers, and New Jersey barriers are essential elements of traffic safety systems, used to regulate traffic flow, guide drivers, and enhance road safety.

Road signs include warning, regulatory, and directional signs made from high-visibility reflective materials, while concrete and New Jersey barriers are used to separate lanes, protect work zones, and reduce the severity of accidents.

ROAD SIGNS

SAFETY TOOLS FOR ROADS

Road safety tools are essential elements used to enhance traffic control, protect road users, and reduce accidents.

These tools are designed to improve visibility, guide vehicles, and provide clear warnings in both temporary and permanent road conditions.

UNIPARK

Unipark is an automatic parking space protection system manufactured by CAME Italy, designed to secure and reserve individual parking spaces through remote-controlled operation. Built with a durable galvanized steel structure and advanced safety electronics, it provides a reliable and efficient solution for residential and commercial projects

AUTOMATIC BARRIER GATE

The Automatic Barrier Gate with DC Brushless Motor is a high-performance access control solution operating on 24V DC power. Featuring adjustable opening speed, obstacle detection sensor, and durable steel housing, it provides secure and efficient vehicle management for various residential and commercial applications

TYRE KILLERS / SPIKE ROAD BLOCKERS

Tyre Killers (Spike Road Blockers) are high-security vehicle access control systems designed to prevent unauthorized or wrong-way entry. The system features heavy-duty steel spikes that allow vehicles to pass in one direction while puncturing tires if crossed in the opposite direction.

Built for durability and reliability, they can be installed as fixed or hydraulic models and integrated with barrier gates and access control systems

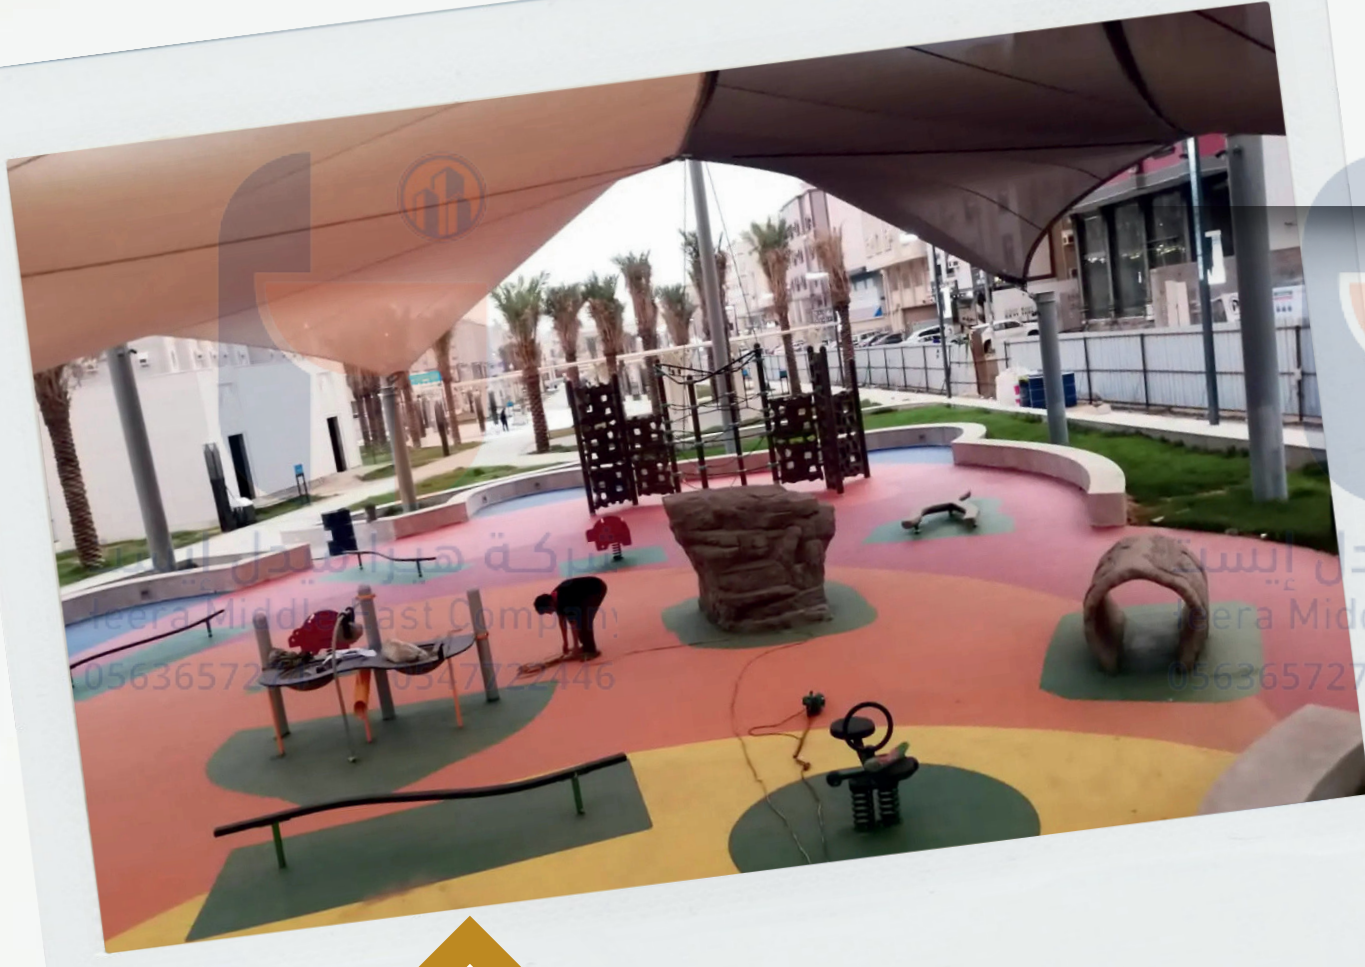

HYDRAULIC ROAD BLOCKERS

Hydraulic Road Blockers are high-security vehicle access control systems designed to prevent unauthorized or forced vehicle entry. The system operates by means a powerful hydraulic mechanism that raises a heavy-duty steel barrier or wedge from ground level to physically block vehicles. Engineered for maximum impact resistance, hydraulic road blockers are widely used in high-security environments requiring strong perimeter protection

EPDM RUBBER FLOORING PLAYGROUNDS & PUBLIC AREAS

OVERVIEW:

- EPDM (Ethylene Propylene Diene Monomer) rubber flooring is a safe, durable, and weather-resistant surface widely used in children's playgrounds and public areas. It is designed to provide impact absorption, reduce injuries from falls, and create colorful, attractive outdoor environments.

MATERIALS:

- EPDM rubber granules (colored, UV-resistant)
- SBR rubber base layer (optional for shock absorption)
- Polyurethane (PU) binder

TYPICAL THICKNESS:

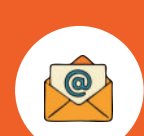

- Playgrounds: 20-50 mm (depending on fall height requirements)
- Public walkways: 10-20 mm

054 772 2446

www.heeramiddleeast.com

info@heeramiddleeast.com

RUBBER & ACRYLIC SPORTS FLOORING

1. RUBBER SPORTS FLOORING

- Rubber flooring is commonly used for indoor and outdoor sports areas due to its flexibility, durability, and shock-absorbing properties.
- SBR or EPDM rubber granules
- PU binder
- Gym areas: 8–15 mm
- Multi-purpose courts: 10–20 mm

2. ACRYLIC SPORTS FLOORING

Acrylic sports flooring is a high-performance coating system commonly used for outdoor courts. It provides a smooth, slip-resistant, and durable playing surface.

- Acrylic resin coatings
- Silica sand (for texture and slip resistance)
- Line marking paint
- 2–5 mm (multi-layer coating system)

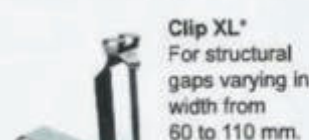

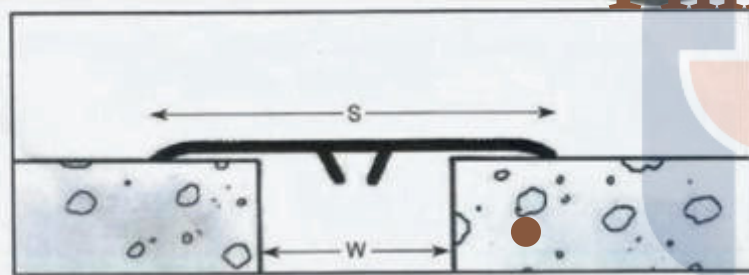

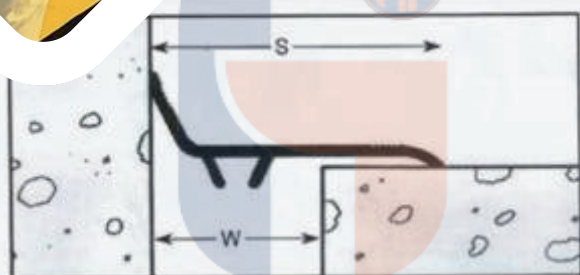

STRUCTURAL JOINTS TREATMENT WORKS

Aluminum structural joint cover system designed to protect and cover expansion and construction joints in floors, walls, and ceilings. The system allows structural movement while maintaining a safe, durable, and aesthetic surface

Materials

- Cover plate: Extruded aluminum profile
- Fixing system: Stainless steel spring clips
- Finish: Natural aluminum (mill finish) or powder-coated (optional)
- Fasteners: Stainless steel anchors (as required)

054 772 2446

www.heeramiddleeast.com

info@heeramiddleeast.com

Structural Joint Cover System

Materials

- Extruded aluminum cover plate
- Stainless steel spring clips
- Optional powder-coated finish
- Stainless steel fixing accessories

Standard Sizes

- Joint width: 15 – 80 mm
- Cover width: 40 – 170 mm
- Minimum joint depth: 40 – 70 mm
- Standard length: 3.0 m per piece

Installation

- Clean and prepare the joint opening
- Fix stainless steel spring clips inside the joint
- Snap the aluminum cover into the clips
- Ensure proper alignment and secure fit

Applications

- Expansion and construction joints
- Floors, walls, and ceilings
- Parking areas and commercial buildings
- Public and industrial facilities

WALL CLADDING STONE ALTERNATIVE

DESCRIPTION

Decorative wall cladding panels designed to replicate the natural stone appearance, suitable for interior and exterior walls in residential, commercial, and hospitality projects.

MATERIALS

- PVC / PU stone panels
- Lightweight artificial stone or composite panels
- UV and moisture-resistant surface coating

IMPORTANCE & ADVANTAGES

- Natural stone appearance with lighter weight
- Easy and fast installation compared to natural stone
- Resistant to moisture, weather, and cracking
- Cost-effective with low maintenance requirements

PARQUET FLOORING

We provide supply and installation services for various parquet flooring systems suitable for residential, commercial, and administrative projects, ensuring high quality standards and precise workmanship.

Types of Parquet Flooring

- ▶ • Solid Wood Parquet
- ▶ • Engineered Wood Flooring
- ▶ • Laminate Flooring
- ▶ • SPC Flooring (Stone Plastic Composite)

INSTALLATION METHODS

- CLICK SYSTEM INSTALLATION
- DIRECT GLUE-DOWN INSTALLATION
- FLOATING SYSTEM OVER FOAM / UNDERLAY
- SURFACE PREPARATION AND LEVELING PRIOR TO INSTALLATION TO ENSURE PERFECT FLATNESS

Feature	Solid Wood	Engineered	Laminate	SPC
Water Resistance	Low	Moderate	Low	Very High
Scratch Resistance	Moderate	Good	High	Very High
Cost Level	High	Medium-High	Economical	Medium
Re-sanding Option	Yes	Limited	No	No
Ideal Use	Luxury Villas	Premium Residential	Offices & Apartments	Wet & Commercial

Solid Wood Parquet

- Thickness: 18 – 22 mm
- 100% natural hardwood layer
- Can be re-sanded multiple times
- Requires proper moisture insulation
- Life Span: 20+ years

Engineered Wood Flooring

- Thickness: 12 – 15 mm
- Natural wood top layer with multi-layer core
- Higher dimensional stability
- Suitable for AC-controlled environments
- Life Span: 15 – 20 years

LAMINATE FLOORING

- **THICKNESS: 8 - 12 MM**
- **SCRATCH-RESISTANT SURFACE LAYER**
- **CLICK SYSTEM INSTALLATION**
- **COST-EFFECTIVE AND EASY MAINTENANCE**
- **LIFE SPAN: 10 - 15 YEARS**

SPC FLOORING

- **THICKNESS: 4 - 6 MM**
- **100% WATERPROOF CORE**
- **RESISTANT TO HUMIDITY AND TEMPERATURE CHANGES**
- **IDEAL FOR KITCHENS AND COMMERCIAL AREAS**
- **LIFE SPAN: 15 - 20 YEARS**
